adaptive refinement, $u \in H^{5/2-\varepsilon}$, $x_0 = 1/(2\pi)$: Signorini vs linear
$k = 0$
$k = 1$
$k = 2$
$k = 3$
error
N
$\|u - \nu_h\|_{L^2}$
$\|\sigma - \sigma_h\|_{L^2}$
Signorini
linear (Dirichlet on all of $\partial\Omega$)
